

Science Superhero Mask

Now that you and Captain Discovery have learned how to make a mask, create your own superhero mask!

Items you will need:

- Template
- Scissors
- Art supplies to decorate your mask such as markers, crayons, etc.
- Glue stick
- Paper
- Tape

Show us your work!
If you make this at home,
take a picture of you with
your mask and post it to
Facebook or Instagram with
#DiscoveryCenterScience

How to:

- Print out the templates. Decide which mask design you would like to use and cut it out.
- You can then decide if you want to decorate your mask using paper, or you can trace your mask onto another material (cardboard, felt, colored paper, etc.) and then cut it out.
- Decorate your mask using art supplies such as markers, crayons, colored pencils, paint, or whatever else you have at home. You can also fill in some items from the other template, cut those out, and then use a glue stick to glue onto your mask.
- When you are done decorating your mask, cut some strips of paper, tape them together, and then tape to your mask.
